TARIFF RATES ON PRINCIPAL AGRICULTURAL PRODUCTS

By
C. F. Wells, Senior Agricultural Economic Statistician

Introduction

Period covered - This report represents a complete history of the Tariff status of each commodity from September 22, 1922, the effective date of the 1922 Tariff Act, through June 30, 1941. The last Trade Agreement to go into effect prior to the issuance of this report was the Second Supplementary Agreement with Canada effective December 20, 1940.

Commodities covered - With minor exceptions this report mentions only those agricultural products that are specifically mentioned in the Tariff Act of 1930 or the Tariff Act of 1922. There are 416 named items in Schedule 7, "Agricultural Products and Provisions". In addition, this tabulation includes certain items from Schedules 1, 5, 6, 8, 9, 10, 11 and 16. But many agricultural products are dutiable although not specifically mentioned in the Tariff Acts, for unless a non-enumerated article is classified as on the free list, it is necessarily dutiable under one of the so-called "basket-clauses" in the dutiable list. There are 47 of these "basket-clauses" in Schedule 7 alone of the 1930 Tariff Act.

Type of information covered - Quarantines upon imports of agricultural products are not listed in this report.

Quotas and other quantitative limitations upon imports established by trade agreements have been shown in the appendices, but these quotas and those established by other Acts have not all been shown in the text.

From time to time changes in the tariff classification of various articles are announced by the Secretary of the Treasury. For instance, one such decision held blackeye cowpeas dutiable as beans rather than free of duty as cowpeas. Since, as in this case, changes in classification do not involve changes in duties, no changes in classification are listed in the text.

Processing taxes and compensating taxes on imports under the Agricultural Adjustment Act are not listed since they applied equally to domestic and imported products. But certain taxes in the Revenue Acts which apply only to imported products or to the first domestic processing of products of which there is no domestic production have been carried in footnotes.

The Tariff Acts provide for various kinds of additional duties which may be applied under certain specified conditions, such as countervailing duties, anti-dumping duties, duties on convict-made goods, etc. This report does not contain a record of these additional duties.

Trade Agreements - The Trade Agreement Act, (Section 350 of the Tariff Act of 1930) permits the President to enter into trade agreements with foreign Governments and to proclaim such modifications of existing duties within certain limits as are appropriate to carry out any such agreement. For information concerning concessions made by the United States on agricultural products in these trade agreements see Appendix 1, page 59. No change may be made in the tariff status of any article mentioned in a trade agreement during the life of that agreement. The fact that the tariff status of an item is bound against change during the life of an agreement is often of value to one of the parties to the agreement and may therefore be thought of as a concession by the other party. All changes in the tariff status of agricultural products made by the trade agreements are carried in the body of the text as well as in the appendices, but the fact that the tariff status of an item is bound against change is shown only in Appendix 1. Under the Trade Agreement Act the new rates and other concessions contained in any given trade agreement apply to articles, the growth, produce, or manufacture of all foreign countries except Cuba and except countries declared by the President to be discriminating against the United States. German products, and the products of all territories under the de facto administrative control of Germany are the only products that do not receive the benefit of the reduced rates and other concessions in the trade agreements. Imports from discriminating countries are subject to the duties that were in effect prior to the enactment of the Trade Agreements Act.

Tariff status of Cuban products - For the entire period covered by this report all products listed in the body of the text, if produced in Cuba and imported by the United States, receive a reduction of 20 percent from the import duties listed in this report unless indicated to the contrary by footnotes or unless marked "from Cuba".

Where a footnote refers the reader to this page for an explanation of the tariff status of a product when imported from Cuba it indicates that until March 19, 1934, that product, if produced in Cuba and if imported into the United States, would have been permitted entry free of duty and that after that date the tariff status of such an article would be a subject for decision by the Bureau of Customs or by the Customs court.

Tariff status of products of the Philippines - All products of the Philippines are admitted into the United States free of duty unless specified to the contrary in footnotes.

Effective dates - The Tariff Act of 1922 became effective September 22, 1922. The Tariff Act of 1930 became effective June 18, 1930. The effective dates of the various changes made under the flexible provision are indicated in footnotes. The effective date of each trade agreement is indicated in the footnotes and in the appendix for that agreement.

Abbreviations - "n.s.p.f." stands for "not specially provided for."
"n.e.s." stands for "not elsewhere specified."
"ad. val." stands for ad valorem. An ad valorem duty is levied upon a commodity according to its value.
"T.D." stands for "Treasury Decision."
"C.D." stands for "Customs Decision."

2/ Imports from Cuba received a 20% reduction in duties until September 3, 1934. The Trade Agreement with Cuba effective that date reduced the rate on honey from Cuba to 1.2¢ per pound.

3/ Under the Trade Agreement with Guatemala effective June 15, 1936, and with El Salvador, effective May 31, 1937, the rate on honey was reduced to 2 cents per pound. Under the new Trade Agreement with Canada effective January 1, 1939, the rate was further reduced to 1½ cents per pound.

4/ The new reduced rate applies to products of all countries except Cuba and except those countries declared by the President to be discriminating against the United States. See page 2 for list of discriminating countries.

Molasses not imported to be commercially used for the extraction of sugar or for human consumption 4/	502	4/	502	4/ 0.03¢ per pound of total sugars

1/ Bulk of this edible molasses and sugar sirup imported for consumption in 1929 tested from 63% to 69% - mostly 69%. Molasses and sirup testing 69% is dutiable at 6.025¢ per gallon. If produced in Cuba it receives a 20% reduction in the tariff and products of the Philippines and Virgin Islands are free.

2/ Molasses and sugar sirups containing soluble sugar solids equal to 6 percent or less are subject to an import tax of 0.5144¢ per pound of the total sugars therein as provided for in the Sugar Act of 1937, sec. 401 (b) and 403 (b).

3/ Under the Trade Agreement with the United Kingdom, effective January 1, 1939, the rate on molasses and sugar sirups n.s.p.f. which contain soluble nonsugar solids equal to more than 6 percent of the total soluble solids was reduced to 1/6¢ per gallon for those testing not above 48 percent total sugars, and for those testing above 48 percent, 11/60¢ additional for each percent of total sugars and fractions in proportion. This reduction is limited to 1,500,000 gallons per year. This new reduced rate applies to products of all countries except Cuba and countries declared by the President to be discriminating against the United States. See page 2 for list of discriminating countries.

4/ The provision of the 1922 Act was on a different basis. The duty in the 1922 Act varied with the percent of total sugar in the molasses, whereas the duty in the 1930 Act is based on total sugar content. The Act of 1922 read "molasses testing not above 52% total sugars not imported to be commercially used for the extraction of sugar or for human consumption, 1/6 of a cent per gallon additional for each percent of total sugars (above 52) and fractions of a percent in proportion." If produced in Cuba it receives a 20% reduction in duty and products of the Philippines and Virgin Islands are free.

1/ Both Tariff Acts contain the following: The term "wrapper tobacco" as used in this title means that quality of leaf tobacco which has the requisite color, texture, and burn, and is of sufficient size for cigar wrappers, and the term "filler tobacco" means all other leaf tobacco. The description of wrapper tobacco in the 1930 act, other than above, is as follows: "Filler tobacco when mixed or packed with more than 35% of wrapper tobacco, and all other leaf tobacco the product of two or more countries or dependencies when mixed or packed together."

2/ Unless otherwise specified tariff rates on tobacco from Cuba are derived by applying the Cuban preferential reduction of 20 percent to the rate paid by other countries.

3/ Free of duty if the product of the Philippines and if not in excess of quota.

4/ This rate specifically established by the Cuban Trade Agreement.

5/ No change; the previous rate listed is still in effect.

6/ In the Netherlands Agreement there was no break in the period from February 1 to June 30; this is made here for convenience in showing the termination on March 16, 1936, of the tobacco concessions in the Cuban Agreement.

7/ The new reduced rates apply to tobacco from all countries except Cuba and except countries declared by the President to be discriminating against the United States. See page 2 for list of discriminating countries.

8/ Applies to cigarette leaf tobacco only.

9/ Applies only to filler tobacco n.s.p.f. other than cigarette leaf tobacco.

1/ The rate on dried, dehydrated or desiccated white or Irish potatoes has been 2.75 cents per pound throughout the period. Potato flour and starch listed under "miscellaneous". All rates which were reduced by any of the trade agreements apply to products of all countries except Cuba and except countries declared by the President to be discriminating against the United States. See page 2 for list of discriminating countries.

2/ The Cuban Trade Agreement guaranteed Cuba a minimum preferential reduction of 50% of the rate paid by any other country on this item.

3/ Potatoes imported from March 1 to November 30 not mentioned in the Cuban Trade Agreement. The 20% preferential reduction from the rate paid by any other country provided for by the Cuban Reciprocity Treaty of 1902 is therefore applied to the rate paid by other countries to derive this rate.

4/ Reduced rates applied to 750,000 bushels per year beginning December 1.

5/ The reduced rates apply only to a total of 1,000,000 bushels per year beginning September 15, except that in years when the domestic crop falls below 350,000,000 bushels, imports in excess of 1,000,000 bushels of other than seed potatoes will be admitted, at reduced rate, to the amount of the difference between the domestic crop and 350,000,000 bushels. Potatoes from Cuba are not to be included in computing quantities entitled to reduced rate.

6/ Reduced rates apply to a total of 1,500,000 bushels per year beginning September 15. The rate shall be 37-1/2¢ per 100 pounds the entire year when the minimum preferential reduction to Cuba on this item is reduced to 20%.

7/ The Cuban Supplementary Agreement of 1939 omits the concession on seed potatoes and therefore the rate of duty on seed potatoes from other countries is 37.5¢ the year around. See footnote 6 above.

1/ Under the Trade Agreements Act these new rates and other concessions apply to articles the growth, produce and manufacture of all foreign countries except Cuba and except countries declared by the President to be discriminating against the United States. At the present time Germany is the only country in this class, and therefore, the only country that does not receive the benefit of the reduced rates provided in the various Trade Agreements. None of the new rates may be increased, and the duty-free status cannot be changed during the life of the Agreement; this constitutes a concession even if the rate in the Agreement is the same as the old rate.

Title IV Revenue Act of 1934

Section 602 - Tax on certain oils. - Section 601(c) of the Revenue Act of 1932 is amended by adding at the end thereof a new paragraph as follows:

"(8) Whale oil (except sperm oil), fish oil (except cod oil, cod-liver oil, and halibut-liver oil), marine animal oil, and any combination or mixture containing a substantial quantity of any one or more of such oils, 3 cents per pound. The tax on the articles described in this paragraph shall apply only with respect to the importation of such articles after the date of the enactment of this act.."

Section 602½ - Processing tax on certain oils.- "(a) There is hereby imposed upon the first domestic processing of coconut oil, sesame oil, palm oil, palm-kernel oil, or sunflower oil, or of any combination or mixture containing a substantial quantity of any one or more of such oils with respect to any of which oils there has been no previous first domestic processing, a tax of 3 cents per pound to be paid by the processor. There is hereby imposed (in addition to the tax imposed by the preceding sentence) a tax of 2 cents per pound, to be paid by the processor, upon the first domestic processing of coconut oil or of any combination or mixture containing a substantial quantity of coconut oil with respect to which oil there has been no previous first domestic processing, except that the tax imposed by this sentence shall not apply when it is established ... that such coconut oil (whether or not contained in such combination or mixture)(A) is wholly the production of the Philippine Islands or any other possession of the United States or (B) was produced from materials the growth or production of the Philippine Islands or of any other possession of the United States or (C) was brought into the United States or produced from materials brought into the United States on or before the 30th day after the date of enactment of this act ... For purposes of this section 'first domestic processing' does not include the use of palm oil in the manufacture of tin plate."

Section 803 - Effective date.- "Except as otherwise provided, this Act shall take effect upon its enactment."

Approved May 10, 1934 at 11:40 a.m. (But since Section 602 taxes apply only with respect to the oils when imported after the date of enactment, therefore Section 602 taxes were effective May 11, 1934.)
